

Jeffrey Claxton

Lincoln, NE 68528 | 618-670-7628 | jeffclax@gmail.com

EDUCATION

University of Nebraska-Lincoln, Lincoln, NE
Bachelor of Science in Software Engineering
Focus Area: Artificial Intelligence

GPA: 3.692
May 17th, 2025

Georgia Institute of Technology, Atlanta, GA
M.S. of Computer Science (OMSCS)
Specialization: Machine Learning

Aug 2026 (Expected Start)

EXPERIENCE

Software Engineer
Software Engineer Intern
Crete Carrier Corporation, Lincoln, NE

June 2025 - Present
January 2025 - May 2025

- Designed and implemented vision-language embedding pipeline with nearest-centroid classification for categorization of eleven million documents
- Develop and maintain internal web applications that support core logistics and transportation operations
- Build and integrate backend services and APIs for shipment status updates, freight tendering, and bid workflows
- Work on integrations with external providers, to exchange logistic data
- Transform and map complex external payloads into internal shipment and stop models with an emphasis on accuracy and traceability
- Collaborate with product owners and engineers to deliver reliable features used in daily production environments

iOS Development Intern
Brain Institute of America, New Haven, CT

June 2023 - August 2024

- Act as the sole lead developer, overseeing the entire development lifecycle from planning to deployment, ensuring a cohesive and high-quality product
- Utilize SwiftUI, Core Data, and Firebase to create an iOS app aimed to improve and test cognitive ability in patients with neurological disorders as well as the general public
- Launched app on the Apple App Store, contributing to increased funding and public exposure (August 2024)
- Gained extensive expertise in SwiftUI, leveraging its capabilities to build a responsive and visually appealing user interface

Software Development Intern
Buildertrend, Omaha, NE

May 2024 - August 2024

- Collaborated with a team of 3 interns, senior developer, and agile coach to redesign Buildertrend's templating features
- Revamped the user interface to improve usability, directly improving the daily workflow of contractors
- Participated in stand-up and refinement meetings guided by an agile coach and full-time developer
- Completed a two-week intensive bootcamp to learn Buildertrend's tech stack, including C#, React, TypeScript, and SQL Server

PROJECTS

Deep Learning Fantasy Football Predictor

September 2024 - December 2024

- Engineered feature sets capturing trends such as recent performance, matchup difficulty, and season progression

- Trained and evaluated neural network models to forecast player scoring outcomes, comparing results against baseline statistical methods and ESPN fantasy football predictions
- Applied data preprocessing, normalization, and train/validation/testing splits to ensure robust model evaluation
- Analyzed model performance and limitations, emphasizing generalization and overfitting considerations

Professional Netorking App (Thawe)

August 2024 - Present

- Building a swipe-based professional networking platform using **React Native, Django, PostgreSQL, and GeoDjango** launched to the App Store and Google Play Store on January 20th, 2025
- Designed and built a scalable **web-scraping microservice** using **Node.js and Playwright** to collect professional and startup event data from multiple public sources
- Implemented authentication, profile onboarding, location-aware search, and matching algorithms based on skills and goals
- Designed backend APIs and data models to support scalable user discovery and filtering
- Collaborate within a six-person Agile team, owning features end-to-end from requirements to deployment

Senior Design Capstone - USDA Wetland Delineation Tool

August 2023 - May 2024

- **.NET WPF** project that aids **NRCS** to help automate their wetland determinations
- Automated entry of data into template documents and convert/combine to PDF
- Served as Development Manager over a team of 5 to develop/enforce the overall architecture, determine technologies, and assist fellow developers
- Utilized Agile and Zenhub to track/determine priority of requirements and improve team productivity

SKILLS

Programming Languages:

Java, Python, C, C#, Swift, JavaScript, TypeScript, PHP, HTML/CSS

Mobile & Frontend:

SwiftUI, React, React Native, Vue, NextJS, Astro

Backend & APIs:

Node.js, Django, RESTful API Design

Databases & Data:

PostgreSQL, MySQL, SQL Server, NoSQL, Firebase

Cloud & DevOps:

Google Cloud Run/Build, Github Actions, Docker, Azure, CI/CD, Cloud Architecture

AI / Data:

TensorFlow, PyTorch, LLM-based Data Extraction, Embeddings, Data Processing Pipelines

Tools & Practices:

Git/GitHub, Jira, Azure DevOps, Agile/Scrum, Visual Studio, VSCode, Xcode, Playwright
